ABOUT GYRAF AUDIO

Gyraf Audio, founded by Jakob Erland in Denmark, evolved from Erland's extensive experience as a sound engineer and technician. Initially creating custom equipment for in-house use in the local studio, Erland's designs quickly gained popularity among local studios. Rapid prototyping and immediate feedback allowed for high-quality, tailored products like the Gyratec G10 vari-mu compressor and the G14 passive stereo equalizer. These innovations spread through word of mouth, leading to the establishment of a small production facility. Known for their all-tube designs and passive signal paths, Gyraf Audio's products are acclaimed for their unique sonic characteristics and reliability, making them indispensable in both recording, mixing and mastering.

Gyraf Audio
G-IX

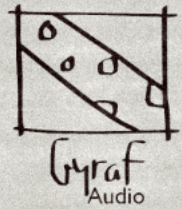

BRAND: Gyraf Audio, DK

MODEL: G9 Dual Preamplifier

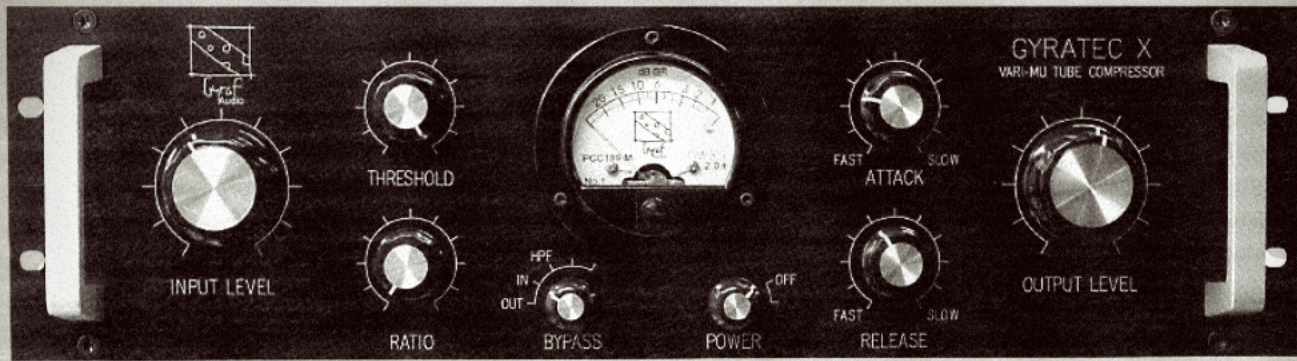

DESCRIPTION:

The Gyraf G9 is a dual true tube microphone preamp with variable gain input and output stages. It features transformer-balanced inputs/outputs, highpass filter, phase switch, and an instrument input for DI. Pure tube audio!

MACH Mastering/Distribution
Gyraf Audio
G-X

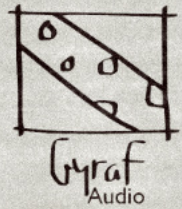

BRAND: Gyraf Audio, DK

MODEL: G10 Stereo Vari-Mu Compressor

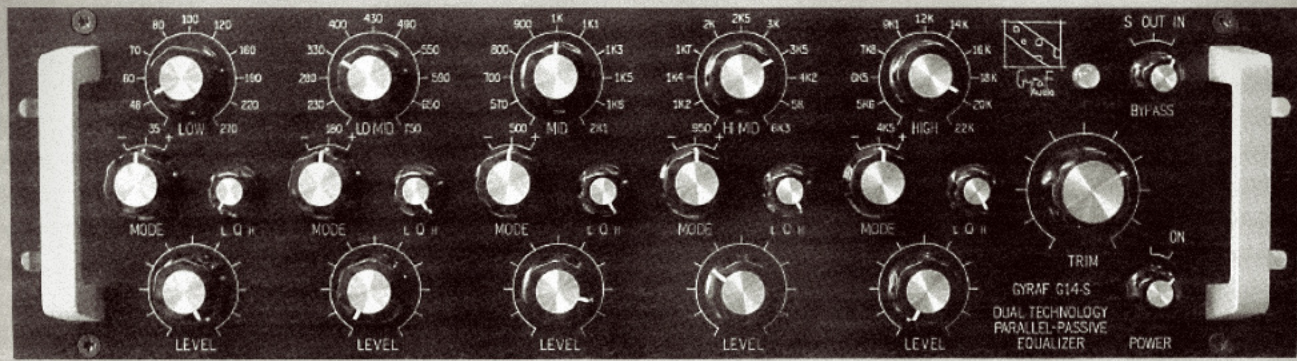

DESCRIPTION:

The Gyraf G10 is a true tube stereo compressor using the classic variable-mu principle for fast, precise gain control. It features input and output level, threshold, ratio, attack, release, and sidechain high-pass filter controls.

MACH Mastering/Distribution
Gyraf Audio
G-XIV

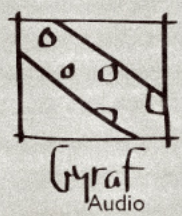

BRAND: Gyraf Audio, DK

MODEL: G14-S Dual-Tech Passive EQ

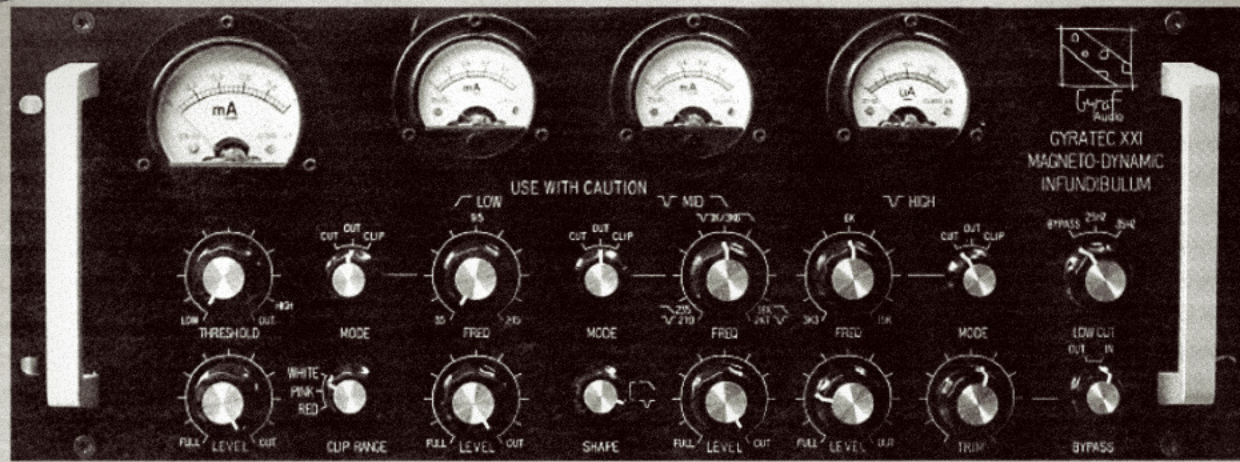

DESCRIPTION:

The Gyraf G14 is a versatile passive stereo equalizer with five bands, each with 11 switchable frequencies and variable Q. It features tube or solid-state makeup gain options and offers precise control for mastering and mixing applications.

MACH Mastering/Distribution
Gyraf Audio
G-XXI

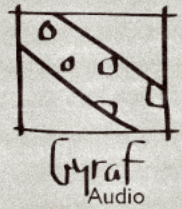

BRAND: Gyraf Audio, DK

MODEL: G21 Magneto-Dynamic Clipper

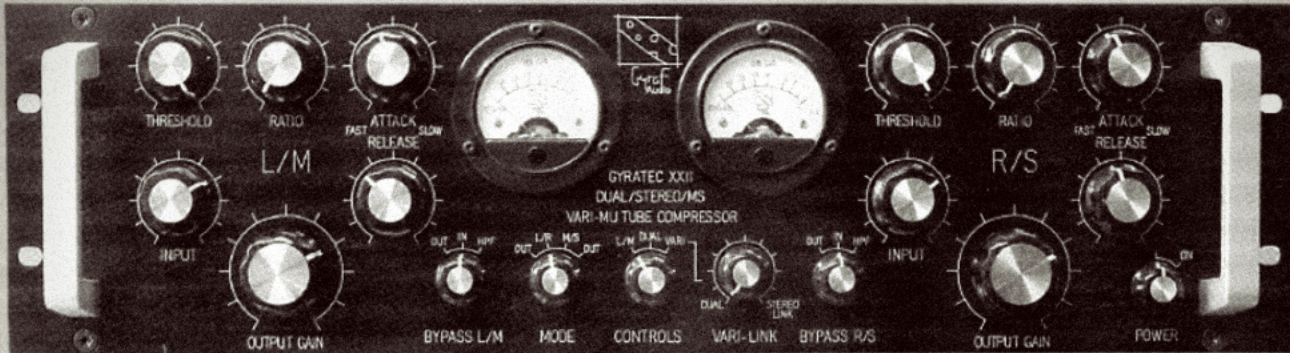

DESCRIPTION:

The Gyraf G21 is a passive multiband stereo clipper with an advanced parallel topology for control without phase issues. With its unique way of clipping, harmonic distortion is minimized. It's perfect for e.g. cleaning up a messy mix, or controlling excessive resonances.

Gyraf Audio
G-XXII

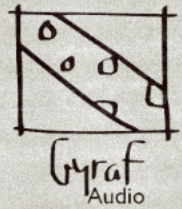

BRAND: Gyraf Audio, DK

MODEL: G22 Stereo/MS Vari-Mu Compressor

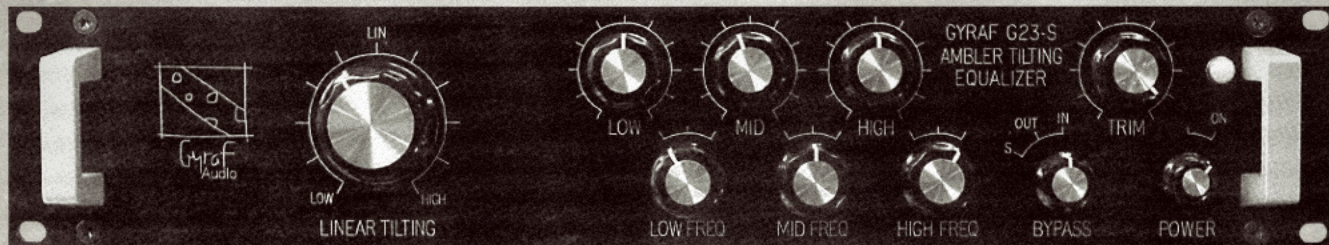

DESCRIPTION:

The Gyraf G22 is a dual-mono version of the G10 vari-mu compressor, with a faithful reproduction of the G10's audio circuit. It features wider threshold range, faster attack time, M/S mode for independent control of mid/side dynamics, and adjustable channel linking.

Gyraf Audio
G-XXIII

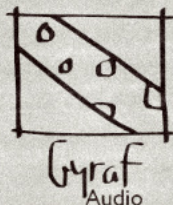

BRAND: Gyraf Audio, DK

MODEL: G23-S Tilt EQ w/Solid-State

DESCRIPTION:

The Gyraf G23-S is a unique tilting equalizer, offering subtle tonal adjustments without compromising overall definition. It features an adjustable 1dB/oct slope filter, a selectable tube or solid-state gain stage, and a gentle Baxandall tone control.

MACH Mastering/Distribution
Gyraf Audio
G-XXIV

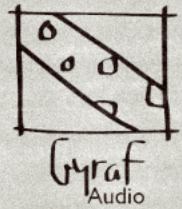

BRAND: Gyraf Audio, DK

MODEL: G24 Passive Cadmium Compressor

DESCRIPTION:

The Gyraf G24 is an optical stereo compressor for mixing and mastering, offering gentle control with a passive signal path. It features two full stereo/MS compressors, variable M/S compression, and fully adjustable feed-forward/feed-back settings. Requires some paperwork ...
